SMALL CHANGE - BIG IMPACT...

Although neck surgery targets a specific area of the face, the procedure can have a dramatic impact on the entire face. In addition to rolling back the years, neck surgery can improve genetic traits, such as excess fat deposition and neck gland prominence. Creating a youthful neck through surgery which removes excess fat, tightens loose muscle and skin results in a more angulated and youthful appearance. To schedule a consultation, call our staff @ 480 661-6197.
